what is that yesterday i was playing some video games and just before i died i got this weird feeling, like i was like did i do something wrong or something? and i just did this weird thing i got this weird feeling that something is going to happen and i was in shock because everything just went blank. so i came home and turned my computer on, just like that. i was wondering what happened, i'm not sure if it's pretty much the end of my life, as of right now, i can say that. but i cant. can any of you tell me what happened? Exact a posteriori analysis of a time-discrete two-dimensional diffusion process. We determine the exact form of the multivariate Pareto front for a two-dimensional system of two species with cross-diffusion. Using a map of the invadable space to the outer boundary of the system, we find the complete parameter-dependent conditions for the species to invade the system. We also examine how the spatial distribution of the invader affects the shape of the front. The analysis allows us to predict the location of the Pareto front for any system and point out the regions of stability and instability. Ocular hydrodynamics and visual acuity in idiopathic intracranial hypertension. To determine if visual acuity is associated with ocular hydrodynamics in eyes with idiopathic intracranial hypertension (IIH). Retinal venous pressure, intraocular pressure (IOP), and ocular perfusion pressure (OPP) were measured in 13 eyes of 8 female patients with IIH. The OPP was calculated by subtracting IOP from ocular venous pressure. Retinal venous pressure ranged from 7 to 28 mm Hg (mean, 16.6 +/- 5.3 mm Hg). Mean IOP was 30.3 +/- 6.4 mm Hg, and mean OPP was 65.3 +/- 11.4 mm Hg. Mean visual acuity was 20/40 (20/20-20/200). The correlation between visual acuity and OPP was weak. However, when the eyes were grouped into those with and without visual acuity of 20/40 or better, the correlation between OPP and visual acuity was significant. Ocular perfusion pressure appears to be an important variable in the maintenance of visual acuity in eyes with IIH. f678ea9f9e
